---

Twelve double hearts geometrically positioned. The idea to arrange the hearts like such, came after several other unsatisfactory variants. The double heart is based on a cuff-link i'm working on.

The night before this piece came into existence, i was working on the same design, which amused me much, but sadly was unprintable. So i remade it the night after. Gold looks good on it, very pleased with that. Shapeways delivered fast, i'd say at least a week before i expected the items, so thanks for that.
