Hello,

I really like most of the redesign work that Shapeways has done lately. I have a question about tags.

I wanted to see all of the entries for the iPhone 5 accessories contest, so I entered "iPhone5_3D" into the search box at the top of the page. I was surprised to see 0 results. The only way I could find to search by tags was to go to a model I had made for the contest, and click on the tag for that model.

Is there a better way to search for all items with a certain tag? Does shapeways have any kind of "Advanced Search" page?

Thanks,

Eric

Well you can follow this link from the blog. I'll see if I can found out how to find it in search...
