A vase with an heart in the centre. Put in right side a white rose, in left side a sunflower. What wonderful composition!

heart vase

right so you are italian?? That's why !

Why it's so quiet on this site? Not very much responses, the same with mine 'Office of Illusions' I've been twice in Italy this summer, and I think it the Florance church had some influence when I created the Magic lamp.

After that I created a whole Cathedral with that single part, unfortunately to expensive to print out

that.

I agree it is really quiet. Threads go with 0 responses for days. I'm going to start making it a point to post more.

I like the vase, I like how the heart goes through it.

Yes, I am italian, from Naples.
Your designs are very interesting and original...
