Hi !

This is my entry for the Iphone 5 contest. This design was inspired by traditional indian pattern designs.

Unfortunately this doesn't fit the Iphone, because I worked with the old (and wrong!) Iphone 5 template.

I am currently redesigning it with the right template and an Iphone 4s version as well.  
Let me know what you think about it !

Thanks

I think it's really beautiful! Easily the best I've seen on shapeways... If only I had an iPhone 5

I received the update yesterday and I'm currently testing it on an iPhone 5.

It fits really good but I'm quite dissapointed by the polishing treatment. Indeed, only the inner faces are polished and not the outer ones ...

I love the look and color, I'd email service about that polish. Doesn't look very polished to me either.

Hey Genghis,

The design looks fantastic but perhaps a little thin. what is the wall thickness of the part?

Thanks

Hi Duann,

The thickness varies from 0,98 mm to 1,51 mm. I'm currently testing it and it is quite strong and flexible.

The case doesn't slip but the corners are maybe to thin for an optimal protection.

Moreover, only the inner faces are polished and not the outer ones. Should I rotate the model

before uploading ?

I'm designing a thicker version for iPhones 4 and 5 and will update it as soon as possible.

Thanks for help !

Genghis wrote on Fri, 16 November 2012 16:38 Should I rotate the model before uploading ?

Currently the position in the file doesn't effect the printing orientation, as the operator decides how they should print to produce the best results. That and the polishing is a post process done in a tumbler, so how it's oriented shouldn't effect the polish.
