---

Need a 3D modeler for a small project to create a hot rod trophy figure.

Using an existing design in SketchUp (.SKP) format, you will convert it for 3D printing, scale to 1/32, and make minor modifications to allow for mounting on trophies.

If interested please RSVP to [mchase@cuttingedgebc.com](mailto:mchase@cuttingedgebc.com) with:

- 1) Your resume
- 2) Payment method(s) accepted
- 3) Hourly or flat rate for job
- 4) Some examples of your work (3D printable objects only)

Thanks,  
MC
