Hi.

I quite like Shapeways' new site UI. Thanks.

However, whenever I delete any models in My Models page, the page numbers doesn't work properly.

If you click on the bottom page numbers after deleting any models, it will drive you to the "http://www.shapeways.com/page-144" page.

Also, if you delete a model on any pages, the current page is changed to the first page.

These issues are somewhat inconvenient.

I hope they can be fixed sooner.

Thanks.

Joe

Oh.

I am using two computers which are with Windows 7 and Explorer 8 & 9.
