I have always been enthusiastic about astronauts, rockets and space travel. I like to watch stars at night, read about galaxies, planets and space exploration. Being able to print this rocket cup and have it at home, see its awesome rocket-like shape on my desk, and drink from it, is like a dream come true

If you are like me, or you just like the futuristic and aerodynamic shape of this cup, you can order it from my shapeways shop.

This cup fits 5 oz / 150 ml of your favourite drink and it's made of glazed ceramics. A fitting lid complements the rocket-y shape and helps keep your drink warm (and protected from that dangerous space radiation!). The cup and lid are separate models and they can be ordered separately, in the same or different colours!
