Dear Shapeways team,

Recently I spotted some strange links between the section pages of one shop.  
You can test this very well e.g. at oprescos shop: <http://www.shapeways.com/shops/opresco>

When you looked at the second page of his e.g. "Jewelry" section and then click the "Mechanical" section, you are led to the second page of the "Mechanical" section which actually does not exist (I spotted the '=12' in the internet adress) in this case.

Would you change the linking, please?  
It was much more logically if a new section would be opened with the first section page.

Kind regards,

Marie

Thanks Marie, I'll report this to bugs.
