Cufflinks, finger rings and earrings in sterling silver with a hidden, secret message.

The perfectly valid QR-code hides a piece of text, an internet address or any other short message type which can be stored in a QR-code. We can add a simple image or logo to the code without compromising its validity.

The unique QR-tops can be produced by Shapeways, and after that, we blacken the engraved pixels of the code and mount the top on its support to form a pair of cufflinks, a finger ring or a pair of earrings.

â€œ The base for the finger ring is available in 7 sizes and 10 different colors.

â€œ The earrings can be mounted on nickel-free pins or earclips.

Due to limitations of the Shapeways shop system and the necessary post-processing steps, the items cannot be ordered on the store. Please contact us directly to arrange for your personal QR message and other options:
