I just laughed so hard when I saw that Sponge Bob episode where squidward turns handsome that I just had to make this tribute. It's a small trophy that you can award to your colleagues in the office for being obnoxious or just to pull a prank on someone and put it on their desk for being so ... beautiful HAhaha anyway, these are some test renders. I have already ordered my first print to see how they will turn out. Real photos will be posted as soon as I get my hands on the actual thing . Please let me know what you think!

Beautiful Squid

Cool!

Is this WSF??? I wonder why the sheets are so visible in the printed model... I've seen other models where the print sheets were totally invisible.

Yeah it is WSF... I think they are so visible because I did not choose polished. :/

Yes, you can see the layers because that's pretty much how it comes out of the machine, minus the extra dust.
