hello, I need to scan the front of a pair of glasses and add the rest of the sides from a particular design that has some spring hinges attached to assemble the part, I would like an idea of first, if it

can be done and then around how much can that cost until the file is ready to print, I would like some text printed on the inside of the templates as to the brand name of the prototype,  
Thank you  
Oliver

Hey there,  
I have quite a few projects on the go currently but I could definitely work something out with you. How soon we're you looking for the prototype? Please email me at [steve@mcaleerdesigns.com](mailto:steve@mcaleerdesigns.com).  
Thank you

Hello,

I am looking for someone to help 3d model a Toy. I have a rudimentary prototype and a similar toy, but no drawings. I need a modeler who can help me take the concept to a functional 3D printed prototype. I live in Los Angeles. Please contact me if you are interested.

Robb Howard

Hi,

I am currently working on an experimental fundraising campaign, for Golden Gate Fundraising, that requires object files for a 12 item toy catalog. The items need not be graphically complex or heavy, just simple object files.

If you do a good job we can contract you out to be the exclusive object file creator of our toy catalogues.

Payment for this initial project is \$350, payments for future projects is negotiable.

I will include the file of the catalog, we can get the toys to you if need be.

If interested please email me: [efreethy@gmail.com](mailto:efreethy@gmail.com), we can work something out over email.

Best,

Evan Freethy  
Golden Gate Fundraising

Dear Sir:

I have built myself a 3 axis CNC Router table mainly for the purpose of being able to produce wood airplane propellers (for decorative purposes only) of various sizes. My problem is that I am really struggling with producing the 3D image required to get this to the router table. I have the propeller which I want to start with. I would be able to supply you with the numbers for the prop or if needed I could supply you with a duplicate of the prop (made from a mold). The prop is 30" in diameter.

Would you be interested in taking on this project and supplying me with a 3D .DXF file, and if so, how much would you charge?

Hi there--I am infectibles.com. I've basically re-worked the process...Just concentrating on the head (about fist sized). Needs a rotational movement, key movement...I posted for modelers needed (zombie toy). Also offering a percentage of the idea once it sells--but undersand if not

Hope to hear from you soon

T

Hello

I am Navjot S Brar. I am trying to build prototype for my product. I need to get specific type of 3D mobile cover design. Would you be able to provide your service for it? This mobile cover is one part of my project. I have an idea and i want to make a creative 3D design of it.

Thank you  
Navjot S Brar

We definitely have experience designing mobile covers, specifically for 3D printing as well. We

would love to see how we can help you, so if you can share some more details of what exactly you want to accomplish, I am more than happy to take a look and get the ball rolling!

If you have any questions, please feel free to let me know. Looking forward to hearing from you soon!

Best,
