Okay, to be honest they have arrived over a month ago, but I've finally gotten around to making pictures:

This one can be worn either single or clicked together.

The two above are sort of inspired by ancient art (Mayan, Aztec) and circuit boards (yes, circuit boards: to create a more technical look).

Also I've remodelled my shop so if anyone has feedback on it I would love to hear it .

Nice work!

I have to say I like your Blanche pendants best... The concept is really good! Have you tried them in metal? Or does that make them really expensive?

Thanks!

I'm planning to order them in silver later, but yeah, silver is never cheap. The wires are too thin for stainless steel, but I might make a 1.5 times larger version to try it out. On screen, both Blanche pendants looked huge already so I thought making it in stainless steel would make for an unwearable big pendant. But seeing it printed, it's still quite small so it might work .
