I'm such a horrible painter and FUD is so difficult to take photos of in it's raw state that I very rarely post anything here, but here goes:

My model <http://shpws.me/lmzC> is of a railroad snowplow.

Here's the model in FUD after cleaning it in Bestine (heptane).

This step leaves a very nice white finish, as good as if you had primered the model.

Here's the (almost) finished model: I've yet to put glass in the windows. Yes, that's a penny.. these models of mine are SMALL.

Here's a link to the prototype:
