Umm... this should be a non-issue as I reported it during testing for InShape2.0 released ages ago

It looks like someone tried to fix the then issue of a 2 line model title hiding the Save button by truncating the title.

There *should* be a 'Save' button below the 'display order' box and as can be seen, it is not visible, let alone clickable.

That's the problem and only Shapeways can fix it.

Hey guys, please include your OS and browser information. I'm seeing the same results with Windows XP using Chrome. I'm reporting to bugs, all details will be helpful in squashing the bug. Thanks.
