Captured Snowflake - Christmas Ornament
Here is the description from the Product Page:

"Make Christmas Eternal!

A Snowflake, captured and preserved in an intricate hollow star cage. The snowflake hangs from 6 loose chains - makes a great unique Christmas Tree decoration using the inbuilt hoop and looks great all year round.

This design can be manufactured in no other way than 3d printing as it exploits the technology's incredible ability to trap objects within objects and create moving parts within a design.

This piece is manufactured for you in your choice of colour when you order using incredible 3d printing technology and then shipped to your doorstep."

I have also uploaded a 'demo' of the ornament on YouTube: see next post
And also a 3D Video of this 3D Printed Ornament Spinning: <http://youtu.be/aF7VJQuOZpo>

I would be very grateful if you could feature this product, especially so close to Christmas.

Christmas Tree is up!!!

I've just taken much better photos of this Ornament in it's natural environment which are now uploaded to the Product Page... Here's one:
