Heyy!! I have this Key design in mind. The design is basically a two keys necklace, each key looks different. I'm not sure if it's possible to make or like to be 3-d printed.

This is the first key:

This is the second key:

They should look like this:

About the dimensions, all I know is that I want them 6 cm in length, and I guess the other dimensions should be proportional according to that. So I was wondering if making them is possible, and if it is, is there anyone in here who could do these for me? Also I don't want to spend a lot of money on these, so how much would it cost me, for a project like this?
