WANTED:

3D modeler interested in designing 1/18th scale parts for various aircraft. I have the original parts needed to be replicated for 3D. Parts range from:

Props

Landing Gear

Wings

Horizontal Stabilizers

Canopies

Wheels

Aftermarket parts

Miscellaneous

The 1/18th scale market is a niche market (About 25 different aircraft in this scale) and has no infrastructure, especially to find replacement parts. If you were to have the 70 or so basic parts (total) designed and available, Im sure you'd see a return investment from the orders processed. Please contact me if interested, or if you'd like more information.

Chris
