Hi,

I created a model <http://www.shapeways.com/model/827929/mediatek-mt3329-gps-v2-w-o-mounting.html?li=productBox-search>

The basic price is 11.52 Euro. I added 2 Euro markup and I can see the price in my shop which is 13.52 Euro, but... when I visited my shop from different PC and I was not logged in the price was 16.36 Euro. Why is like that? Do we see net price in our shops?

Regards
Krzysiek

Yes. The difference you noted amounts to 21% VAT (is that correct for your location ?)

I live in Poland (EU) so I guess the VAT tax should be 0%.

I think I know what is the reason. If I am not logged in the default price is with 21% VAT.

Yes. Should be your local rate (23% according to various sources on the internet), so shapeways is either using an outdated value or defaulting to the Netherlands rate when they cannot geolocate a user.

SW applies, at bill time, a VAT of 21% to all EU address based orders, except Germany and UK, where it charges 19% and 20%. Probably the only two countries where they have sold above the threshold (100 and 81 thousand as per table)?
