Hello everyone !

I would like to know how you design your models printed in Sandstone.
I found this material amazing but I have no clue how I can make one.

I use Solidworks 2010 to design my creations but how can I apply colors or textures on them ?

Thanks for the help !!!!

Haven't a clue about Solidworks, but Google does
See - SolidWorks Help Appearances Mapping PropertyManager

And you might find more info in Shapeways Tutorials

Thanks a lot !
I will look at those tutorials and try !

Can't wait for it !!

Hey there,

Here is a tutorial on how to color geometry without maps.

<http://www.shapeways.com/blog/archives/491-How-to-Full-Color-3D-Print-with-Shapeways-from-SolidWorks.html>

Let me know if this helps?
