Hey everybody,

Wow! What a supercool site. I've been sculpting digital miniatures professionally for two years now and if everything on Shapeways works as well as it seems to then this will be huge for my personal work!

I just placed my first order and I can't wait to see how everything turns out.

Here is a link to my website:

Hey neighbor!

I just joined and i see you went to AIS.

I like your style of miniatures. Have you used shapeways yet and it the detail level good enough for your models?
