Hi,

I created a model which is around 19 cm x 6 x 2. Everything is good, and I'm looking forward for the finished product.

Initially I wanted to print it in "Frosted Ultra Detail", but I don't have this opportunity, in the "select material" box, for Frosted Ultra Detail, it is written "not printable", indeed I can only print it in Frosted Detail.

Why? Is there some restrictions (like total model size, or about shapes diameter width)? I didn't manage to find the answer in the FAQ or the material page.

Thank you.

Nicolas Zin

Hi Nicolas,

There's a maximum bounding box for Frosted Ultra Detail (FUD) of 127x178x152mm It is mentioned on the Frosted Detail material page.

OH!

Ok sorry, I didn't saw it.

Thank you
