If no ones interested that's fine but I need to know how to get people to buy my stuff. The Glock Keychain for example.

I have taken pictures and made a video of it but what next? How do I get people to buy it if they are Interested?

I made a Botkiller from Team Fortress 2 on my site and just ordered it. So what do you guys think?

So you can just tell me what I need to do to get alot of people to visit my shop.

Thank you.
