Using IE8 on WinXP, uploading an image on the model edit page doesn't work  
Works ok with Chrome though

Yes, uploading image on model page does not work on IE for ages. Same thing with uploading customized model in co-creator customization page.

It seems that Internet Explorer compatibility is no more a priority. Who would have bet on this 5 years ago?

I haven't heard anything about IE being deprioritized (at least, not at Shapeways . I'll pass this issue along!

Bart
