Hello!

I want to make something for a trophy that's from the objects of Minecraft.
I made a rar with png files in it, the example 3d file show how it could look like..

En the rest of the png files is for the covering the 3D objects thats what would printed.

The 3 objects must stick together as one object. And there must be an hole for standing on the trophy.

I wish i could made my one 3D models but that's out of my capability.

And i think there's a lot of questions so feel free to ask me xD
g.weyggers@gmail.com

Sincerely,
You all.

Hi ccsoon,

is it an option to design this yourself in Minecraft? If so, then it's quite easy to export it to Shapeways and have it 3D printed:

<http://www.shapeways.com/blog/archives/1738-shapeways-loves-minecon.html>

Cheers,

Bart
