I hired the help of a fellow Shapie Justin Howlett to create the model and he did a grand job. No1 in the series the Wire Stag Head is available [here](#)

Expertise: Models created, checked, repaired, shelled and colored  
Experience: 10yrs+  
Rate:Fixed rate,no two jobs are the same,email to discuss

That worked out great. Could you share your modeling technique for that?

EDIT: I guess Justin Howlett would need to do that. Does he post on the forum?

Hey thanks all for the comments, it's an interesting project which will lead to a better designs unique to 3D printing.

Jrey, the method is to create a shelled form and then split or trim the form with projected curves. Most NURBS software like Rhino 3D and Maya will do this.

V
