---

A large package arrived safely in Australia via Holland.

AOK.

Nice 3D prints of the Oz Bushmaster and ASLAV - very well done in HO and N Scale..

Very well packed.

Previous difficulties in overpacking and compression of fragile models appears to have been overcome.

Good use of air filled bubble wrap and thick wads of Poly fibre are very effective.

However, there still exists the tendency to stuff small items in zip lock bags barely large enough for some items.

I realise that the zip lock bags are used to keep all the bits together but pushing the model into too small a bag makes removing the item difficult and breaks things off.

Keep on improving!

ChassoZ
