I've been trying to access the shapeways 3d parts database but I can't gain access to it. It asks me to log in to view/download the parts, but when i log in nothing changed. There are no parts to view. Is there nothing in the database? Is this a glitch?

Looks like you're right - I'll follow it to our developers right away.

Bart

I'm glad it'll (hopefully) soon be fixed, thanks!

Any update on this? It seems the 3D parts database is still down.

Hi all,

I'm afraid the 3d parts database isn't coming back; it will be replaced by a list of downloadable models on our site:

<http://www.shapeways.com/gallery?downloadable=1>

Bart
