I will create a 3d model of just about anything that you need or want 3d printed. I will keep the cost low and based on what you can pay with in reason. I do try to work within anyone's budget where possible.

I have created 3d printable files such as , Jewelry , I phone cases, Figurines, Computer parts, Car parts, washer and dryer replacement parts, RC parts, Toys of all kinds, even full color prints of statues, figurines. My skills and imagination are not limited :)

After 4 years of creating 3d printable models, I can Guarantee 100% that you will be satisfied , and that your file will print without issue! I follow and have studied for years all of the printers specs and guidelines to a "T"

Feel free to email me with your ideas at webcreatings@gmail.com

View just a few things I have created <https://www.shapeways.com/shops/solodesigns>

Image sent by a client of a 3d printed replacement stove knob that I created the model for
Thanks for the image Doug

I'm looking to get a quote for a miniature usable in D&D style games. I was wondering if I could get two quotes, one for less complex and another for more complex. (and maybe a bit of a definition on what you would define as more or less complex) Including the designing of the item (I'm not really good with any medium to give you an image). Please let me know with a rough estimate, thank you

Tim - since there doesn't seem to be any review system in shapeways yet (hint, hint customer service people) I wanted to write here to thank you for helping turn my sketches into a fantastic 3D model. You were very responsive to my edits and questions and made the entire process of submitting a 3D image (that was ready to print) painless. I would (will) definitely use you again!

Cheers,
Jeff

Hello T.J., I need some help making some 3d models of some characters from this cartoon comic I created and I'm trying to get it published into an actual animated cartoon. I just need some real good solid 3d models of eight of the main characters, the models can be 4inches. Please email back and tell how much I need to pay for eight 4inched models, Thanks email back at Carltondowdell32@yahoo.com

Hi

first of all can you make wargame mini. like 40k, horde,etc. If yes because I'm planning in making my own wargame and I'll need a guy that could do the minis. 28mm +

Also lets say a single 28mm minis of a ww2 soldier how much would that cost?

If you can and I can afford I'll take in consideration in sending you the pictures of mini I have in mind

Hi

Can you make a 3D printed high heel shoe model (STL) like this?

<http://www.thingiverse.com/thing:31218>

It needs a empty compartment in the heel to fit an electronic bluetooth device that our company made.

Thanks!

Hi Tim,

Travis here,

I am new to 3d modelling/printing & was wondering if you could provide me with a quote to convert a 2d cad file, (I can provide in dwg or dxf if you like) to a file that can be printed by shapeways (sketchup if possible).

Attached is a pdf of the item, with some extra details in the text at the bottom.

Please let me know if you have any questions.

Regards,
Travis.

[View Forum Message](#) <> [Reply to Message](#)

I'm wondering if you could help me and what the cost might be for my little project. I have made some 3d scans of 3 fingers that I would like to print out. I know it would be cheaper to print them if they were hollow but I do not have the software to do it. So, I have to see if it's cheaper to hire someone to make the images hollow or just to print them solid.

Thanks

I have DICOMM images that I need converted into 3d files. I know there is software that can do that, but it will also have a slight bit of metal artifact creating a little distortion that needs to be cleaned up. Is this something you can do? The movie on this webpage will give you an idea of the metal artifact I am talking about <http://bormanviolins.com/CTResearch.asp> We want to create violin tops only as molds for other makers.

I have a small design that I need a 3d design for.
I have photos of it.
What's the rate for a small object?

Hello,

My mother is a crafter that currently has to cut out numerous pieces out of wood . I am looking for someone who could take these simple pieces and get them printed in a plastic suitable for outdoor use. I am also interested in knowing the cost to see if it is even feasible for her. I can provide more details if interested.

I am interested in paying you to make pieces of a chess variant I find quite intriguing. The chess variant is named DRAGONCHESS. It was created by Gary Gygax (the creator of Dungeons and Dragons). The variant was introduced in 1985 in Dragon Magazine, issue No. 100. I have searched all over the web and have found no sets for sale. NOTHING!

Here is a list of the pieces:

- Basilisk (minor)
- Dwarf
- Elemental (major; preferably something with an Earth-like design)
- Cleric (major)
- King (major)
- Mage (major)
- Oliphant (minor)
- Paladin (major)
- Thief (minor)
- Unicorn (minor)
- Warrior (essentially the ordinary Pawn)
- Hero (minor)
- Dragon (major)
- Griffon (minor)
- Sylph

As you can see there are many pieces. I need someone who can design a 3D image of each piece. Unfortunately, I do not have an initial design for each piece. This will be entirely up to you. I can provide you images I've found on the internet, but that is all. I've seen your work and I am fully confident you can create something excellent. I am hoping that each piece be fairly simple in its appearance (similar to normal chess pieces). I want a player to be able to recognize each piece when playing the game. The design should be symmetrical! Nothing to flamboyant and flashy.

I'm currently not sure what I want the size for each piece to be specifically. I'm hoping this will not be an issue and the size can be adjusted after the 3D design is created. I've labeled the pieces above as either major or minor. I would prefer a minor piece to be 2/3 the size of a major piece and a Warrior, Dwarf, and Sylph to be 1/3 the size of a major piece. Do note that each square of the board will be approximately 2 to 2.5 inches in size. I would like each piece to fit comfortably in its square. I do not want a piece so large it will obstruct another piece in the square adjacent to it. I hope this all makes sense and is appealing to you.

Please contact me if you're interested.

My email is gblong1117@gmail.com. Contact me here or there, it does not matter.

I'm looking for something to be created with Ninjaflex to hang off my gym bag and allow my slippers to air dry. Can you help?

Maybe something that is striped vertically? I'm not exactly sure how you could make something that is can be stretched to fit slippers in via the top, and hooks to that opening though.

DT

edit: LOL! Wrong screenshot.

Hi,

I am looking for a 3D designer to design iPhone case for me. I need a 3d design. As per me this should be a couple of hours of work. Can you please let me know if you can help me? Secondly, where are you located?

. I am trying to build prototype for my product. I need to get specific type of 3D mobile cover design. Would you be able to provide your service for it? This mobile cover is one part of my project. I have an idea and i want to make a creative 3D design of it.

Thank you
