I am looking for someone who can make approximately 1/3000 scale ships that will be used a master for plastic injection molding. The voids under the guns will have to be filled, flat hull (waterline) model, good detail but able to pull from a mold. Please PM me with approximate cost per ship, time frame to do each model. Please price that there will be ongoing ships of 24-50 over the next few months.

Hi,

unfortunately I cannot help you with this, but I am interested to know where you will get your injection molding done (the States I guess). Any tips for a n00b to injection molding?

Thanks
