Hello everyone!

I'm just another modeler/designer, not much to say really other than that 3D modeling has been a self-taught passion for many years now. I decided to want to share my prints with the world so I decided to open a shop here. Feel free to check it out at <http://www.shapeways.com/shops/shapeshiftdesigns>

I mostly use 3Dsmax and mudbox, for modeling with vray for rendering

currently trying hard to learn organic modeling, mudbox makes that quite easy!

Looking forward to spending some time here!
