About 50% of the tags i add to a model don't get saved the first time i add them, i have to repeat the proces of adding tags and checking if they are saved many times to get a decent amount of tags

When i've added some tags or edited the name of my model and then decide to add a description to my model the description fails to save,

exit edit mode : edit model : retype

I've experienced this many many times now since shapeways 2.0, can you please have a look at it some time in the near future and try to fix this ?

Thnx !

I too have experienced this with tags for a long time. Spend ten minutes or so putting it tags, only to exit edit mode and have three-quarters of them disappear. Win7, Chrome.

For me the problem has been resolved very quickly after i've started this topic, now i can tag as much as i like !

Shapeways service +1
