Hello,

I'm looking to get some belt buckles made.

Specifically a batman symbol: <http://i47.tinypic.com/2r70pc3.jpg>

A deadpool belt buckle, similar to one i've made in the past but I would like to get it perfected through some 3d modeling:

And possibly some x-men style buckles:

If this is something you would be interested please send me a message and we can discuss details.

Thanks!
