I'm working on a new project that will use full color sandstone so I made a few designs to test it out. I ordered them last Tuesday and they arrived in exactly one week! Thanks for the awesome service guys!

These prints range from 4 to 6 inches in size and are 2 to 2.2 mm thick

Woo hoo!

I watched the progress of these via Instagram so it's AWESOME to see them in living color!

Congrats Jessica they look ace!

Wow! FCS can be so vibrant! I'm definitely going to have to test that material sooner rather than later. And I must say these are really sweet test prints.

Looking great! Really strong colors! I guess it's like taking drugs but without side effects!

Michael
