Hello, folks.

I need some small scale (1:150) models made of some specific equipment/ vehicles.
A vibratory plow, a brush clearer, etc.

They don't need a lot of detail, but they do need to be researched and modeled pretty quickly.
I'll be looking for the STL or DWG files, so that I can produce them on my own 3D printer.
They are for a scale model of cable-laying techniques.

Anyone interested can email me at this address:

noel@monolitham.com

I can then provide you more information so you can give me a price.

Thanks!
