I want a 3D model to design and print small toy cyclists. (see pic)

I would love to have 3 models. Winner, drinking and just riding for example. No much detail needed

I want to customize them. (for local clubs and to make famous cyclist replicas).

I would love to have a customizable file to change the outfit. It would be great to apply .jpg files or .psd files so I can change the jerseys in each 3d model.

And I would love to change the bike colour as well in every model.

I will pay if someone helps. Or we can co- run a shop and co-work.

I am good with photoshop and graphic desing, so the outfit thing could be easy for me.

HELP ME I think is a good idea
