Hi I'm here! I wanted to know where can I find some tutorials for blender to learn how to make a cartoon character for 3D printing. I know my way around blender, but I just wanted to know if there any tutorials for blender dedicated for cartoon modeling?

Hi there , I want to share my advice for tutorials about 3D modeling with Blender. Actually when I first start model with Blender I have no idea what to do with it... But my wish and stubbornness bring me to the Youtube, Google , Vimeo channels to look how to create models.. And other thing is to download other creators models and open it with Blender to explore it in details and get the main idea how it was created.. Only for experience comes best skills.
