Hello Shapeways.

I am a 3rd year mechanical engineering student. My focus so far has been computer aided engineering, and I love 3D printing technology.

I've already designed some models for printing at the Shapeways, however I would like to expand my portfolio in a bit faster rate and therefore will do some modelling.

PM me here if you are interested

Regards,

Ronsaki

I have a project which is a pendant with some fine lines. Would it be possible to talk to you about it? I'm looking now for a 3D modeler.

Hello there,

this is Silvia Imbergamo, I am a third year student in CSM, college of arts in London and i am desperately looking for help. As you know 3rd year is the final project time and I m working with 3d printing for textile design....I would be so relieved if someone can produce for me, possibly on sketch up a very easy thing which is sort of architectural model using only 3 geometrical shapes:

triangle, circle and square, in order to the make my order then.

I was actually looking for private lessons, as this could be just the beginning and i might need more help later on.

Hope I hear from you soon and hope u live in london.

Ps: if u need more items to put in your portfolio we can collaborate together as i am going to produce textile pieces and i m willing to send u the outcome back....

thanking u in anticipation.

silvia

Hello, it is Silvia again, I was wondering if that could be enough for you to understand what i need to send to shape ways.

I apologize if my knowledge about the program is not that broad, but i have tried to do my best.

I need to create piramides cubes and cilinders all over a body, eventually i need to make a sort of layering work...there is an architectural model next to the body that shows you the idea that i need to convert for a pattern then....from what i got you don t know how to work on a body, i just upload a body and I went all around it...I don t know if you can do that...?

Hope to hear from you soon,  
Silvia.

Hi, I am making a necklace pendant for my sisters confirmation, but I'm new to 3D modelling. It comes in 2 parts, and I was wondering if you could fix my model so it would be printable, and make some adjustments to one of the parts

Hi Ronsaki,

I've partially modelled the basics of a large ring (for jewellery design) and need someone to help model the finer details (I want to add shells).

Plus I have trouble when I export to an STL... my curved shapes turn geometrical..

Would love it if you could finish modelling for me!

I have it in both STL & FBX format...

Let me know if you're able to and I'll send through the files,

Kind Regards,

Carly

Hi,

May I call or email you regarding a design project?

I'm seeking a designer who can work on site in Manhattan for the first project, then remote for other projects.

Projects include:

- novel water bottle concept
- cobra belt buckle

- glasses

- skull mask

Please reply to [smugsly1@gmail.com](mailto:smugsly1@gmail.com)

Thanks,

Evan

Quick review from a very happy customer !  
Ronsaki has delivered fantastic work: two sizes of a ring with our design celtic knotwork.  
Ronsaki was polite and patient, asked all the right questions, gave excellent advice and has been a real pleasure to work with.  
Highly recommended!

Hi,

I have a small piece i need turned into a 3d cad to make on shapeways. My husband and i own a metal casting company. We need to find a reliable 3d modeler who can create cads for us. We are located in Huntington Beach, CA.

I wanted to know your rate to do this monogram. We are hoping that if your rates are great, and the piece comes out well we can collaborate on more projects

i can send you the file. I drew it up on illustrator.

Please let me know,

Thanks,

Erika

Hi. I am looking for someone to design an idea I have. I have some sketches, pictures and some prototypes. I'd like to use 3D printing.

What are you fees and how would we get started?

best  
Mike
