I have a small pendant with a solid center figure and then thin leaf or feather like lines and fronds around. I have the image I drew out that my friend created into a digital image.

I now need to take the next step and get it made into a 3D rendering I can then use Shapeways to print. So it will require to be compliant to Shapeways requirements.

I am looking to possibly make 1-3 version so i can test which one is preferred once printed.

Please contact me directly and I can supply you a copy of my trademarked image for quote purpose.
