Hi everyone,

I need some basic pieces for a board game that I'm making. Essentially 4 different size cubes with one side open on the larger 3 and sized in a way that #1 fits inside #2, #2 fits into #3, & #3 fits into #4.

I don't have any experience designing 3D images so I'd love some help with this. I have a little money I could pay someone, not much though. I'm hoping this would be pretty easy for someone who knows what they are doing.

Thanks!  
Austin

I can do this for you what dimensions do you want?  
Example shown is:  
largest cube width: 25mm  
wall thickness: 1mm  
gap: 0.5mm
