Looking for a modeler that is willing to translate the following design into a silver pendant with a loop that should cost no more than \$30-\$40. Wanting to keep as much of the original intricacy of the design and hopefully have as many holes in the piece as possible. Only can afford to pay \$60 now, but if I like it a lot there should be a lot of regular business as I get my fabric and jewelry company off the ground: [www.facebook.com/shivura](http://www.facebook.com/shivura)

At that point I should be able to pay more for the pieces.

I'll take a look at it, what material it will be, silver glossy or normal, the material may decrease costs.
