Subject: Copying All Meta Data from one model to another?

Is there a way to copy all the information from one model, (it's description, prices, meta tags, photos) and paste them on to another model, like say the same model but with a rope loop?

Better yet is there a way to specify what you want to copy?

I was hoping maybe the CSV markup would help, but it doesnt seem to actually have anything but prices, and even those strike me as confusing and not especially helpful.

Thanks for any tips...

Hi OBjuan,

I'm sorry but we don't have such a copy/paste tool yet.

Bart
