Namaste!

My Name is Stan, and I am a graduate student at Maharishi University of Management in Fairfield, Iowa USA. And as an aspiring 'Self-referral' art student my financial resources are rather limited. It is my I hope to work with a graphic designer who can provide me with a quality file ready for 3D printing at a reasonable price. I have several similar designs on this theme in English and in Sanskrit that I eventually wish to print in 3D.

This trial job is realistically the first of many potential projects.

Attached is a .jpg graphic of a 2D art concept file that I wish to have drawn as a 3D CAD file capable of being used by a 3D printer.

Essentially I wish to print a 3D prototype model of this design that is approximately 5" to 8" in diameter.

As required I will supply the appropriate Sanskrit font and text string.

Kindly provide me with a fixed price quotation for this job.

javascript:void(0);

Thank you,

Stan Kendz
