I ordered a sample of my Robo Chess set.

It actually took two orders. The first time the king arrived with a missing leg, but I got that sorted out with customer support.

I think I may make a larger version available as well. Should make some of the details show up better and decrease the chances of lost legs.

Sweet Idea!

One side in white, one in black....(or red and violet)

Greetings
Dragoman

Very nice. Right from the very start of joining Shapeways I have had the intention of designing a chess set but never got round to it. There have been quite a few nice sets here.
