Dice 100 - Frosted (ultra) detail

Is this material strong enough to be taken, narrow, launched and shaken many and many times, as usual in a role playing game?

Can it be painted?

You'll have to contact the designer and ask how thick the walls are.

FUD is quite fragile at the minimum wall thickness of 0.3mm
But.. this model <http://shpws.me/IDev> has walls that are >2mm thick and I'd dare say it could support 15lbs without crushing

So the answer is mainly in finding out how thick the walls are.

Yes it can be painted.

Mmmmm... okay.

With what sort of paint can it be dyed? Acrylic? Tempera? Oil?
