I need someone that can design 1:24 model cars. I have a buddy in the military that had to get rid of his truck due to issues it was having. He loved the truck and it was a tough thing for him to do. I wanted to put together a 1:24 scale model of it for him but no one sells anything even close to what it looks like. Can anyone help?

Between my gaming career and freelance work I had done close to 200 vehicles of all different types, shapes and applications. From Lego, to Military simulation to Racing to You name it.
