Hi, I'm Chris. I've decided to branch out into custom work for anyone who wants 3D printed parts. I've mostly done robot hands up til now, but also a few other parts. I have experience using Shapeways to produce functional robot pieces, including those with mechanisms printed in one piece. My speciality combines flowing organic designs, whilst maintaining accuracy. So I can make it look good as well as make it work!

If anyone is interested then my website is at [anthromod.com](http://anthromod.com)  
My shapeways shop is [here](#)

A few pictures and a video made by a colleague using one of my designs.
