If you had a need for designing boxes that could be folded flat and later assembled into something box-ish, here is an interesting article:

<http://hackaday.com/2013/02/27/acrylic-enclosures-use-integrated-clips-to-do-away-with-fasteners>

Clever! Thanks for sharing Stony.

I've spent many an hour thinking of this very thing, so I can appreciate the cleverness of it. Also too, referred to in the same article is this. A combination of the two methods would make a really nice looking case reminiscent of the Form 1 case.
