I'm an engineer in my day job and do mechanical design. I am relatively new to 3D printing, but I have 11 years of engineering experience. I also do more artistic things at home as my hobby. With Shapeways, so far I have designed rings, pendants, and charms. I've also designed a vase and a picture frame. Cost really depends on the complexity of the project and how many pieces you plan to purchase. What can I design for you?

Hi,

I have a simple idea for a new utensil .

I need help in the design and the prep work needed for an estimate.

Todd

I'm interested in learning more. Can you PM me some details of what you have in mind?

Thanks,

-Dan
