Get your 3D models made right the first time! I have the experience and skill to create accurate and artistic sculptures and also prepare them for 3D printing with the most efficient use of material, which makes for less expensive printing! Please check out my shop, <http://www.shapeways.com/shops/rksculpture>

and also my youtube channel: <http://www.youtube.com/user/squirc>

My prices are based on your needs, so please contact me for a quote at [ryankittleson@gmail.com](mailto:ryankittleson@gmail.com)

I require 50% up front and 50% once you approve the sculpt based on images and video. Then I'll send the finished 3D files and textures.
