I have a point cloud data set from an underwater sonar survey of a shipwreck (file is .XYZ). Is it possible to convert this data into a format acceptable for a 3D printer? Anyone out there able to do this work for us? You can contact me directly if you prefer: saraht@lcmm.org. Thanks for your thoughts on this.

Hi, I'd like to help you on this, can you send a sample file to info@dotsan.com?
Regards
Vijay

It would be really interesting to see the results.. I'd encourage you to post some pictures as the project progresses.

I've moved this thread to the '3D Modeler Needed' forum.
